

# HONEY AI Whitepaper

## Introduction

Honey AI is a decentralized AI platform built on Solana, designed to empower memecoin communities and small-cap crypto projects with real-time, AI-driven insights. By deploying AI agents that analyze social sentiment, on-chain activity, and viral potential, Honey AI provides value where it matters most: fast-moving crypto narratives.

## Vision

We believe the future of crypto isn't just about protocols and infrastructure—it's about narrative. Honey AI exists to serve the swarm: a collective of traders, meme creators, and builders who move markets. Our goal is to make their intelligence faster, sharper, and more profitable using decentralized AI.

## Token Overview

- **Token name:** Honey AI
- **Ticker:** \$HONEY
- **Blockchain:** Solana (SPL Token)
- **Total Supply:** 1,000,000,000 \$HONEY

## Token Allocation

Category	%	Tokens
Train-to-Earn Rewards	30%	300,000,000
Ecosystem & Grants	20%	200,000,000
Team & Advisors	15%	150,000,000
Community Growth	15%	150,000,000
Early Investors	10%	100,000,000
Liquidity Provision	10%	100,000,000

## Core Features

### AI Agents

Autonomous AI modules that: - Detect early memecoin trends - Monitor sentiment shifts on X/Twitter, Telegram, and Reddit - Predict viral potential of tokens - Provide actionable insights via dashboards and alerts

### Train2Earn

Users earn \$HONEY by helping improve AI accuracy through feedback, signal submissions, and community ratings. This is not a giveaway model—it's a contribution economy.

## HoneyScore

A reputation system that tracks each user's contribution quality. Higher scores unlock better tools and higher earning multipliers.

## AI Marketplace (2026)

Open platform for developers to deploy and monetize their own AI agents, trained on memecoin or niche crypto data.

## Roadmap

Phase	Milestone	Description
Q3 2025	Token Launch + Whitepaper + Site	Official launch of \$HONEY, socials, and whitepaper (no airdrop)
Q3 2025	Community Activation	Discord growth, community games, early insights for holders
Q4 2025	AI Agents Alpha	Launch of Honey AI's first memecoin trend trackers and dashboards
Q1 2026	Train2Earn	Enable contribution-based earning for feedback and data labeling
Q2 2026	dApp Integrations	Honey AI plugins for wallets, NFT tools, and Solana explorers
Q3 2026	AI Marketplace	Open market for launching custom AI agents monetized in \$HONEY

## No Airdrop Policy

Honey AI does not rely on speculative hype or unsustainable airdrops. Instead, we deliver real value from day one through product utility and community contribution.

## Conclusion

Honey AI aims to be the go-to intelligence layer for memecoins and small-cap tokens, giving communities the AI tools they need to thrive in a fast-moving market. \$HONEY powers the ecosystem with fair incentives and scalable infrastructure built on Solana.
